LEARNING SERIES

April 19, 18:00

Amazon Office, UBC 5, Sf. Lazar Street 27A

Data Mining - a Software Developer approach

During this workshop we will talk about how to manipulate and visualize data, in order to make data-driven decisions.

This workshop will help you:

- Import data from various sources
- Clean and prepare data for analysis
- Manipulate data and gather insights
- Choose between methods to visualize data
- Upgrade your Software Developer Toolbox with some Data Science tools
